(Company No. 820-V) (Incorporated in Malaysia)

#### Part A : Explanatory Notes Pursuant to FRS 134

#### A1. Basis of preparation

The unaudited interim financial statements have been prepared under the historical cost convention unless otherwise indicated in the significant accounting policies and in accordance with the requirements of FRS 134: Interim Financial Reporting and paragraph 9.22 of the Listing Requirements of Bursa Malaysia Securities Berhad.

These financial statements should be read in conjunction with the audited financial statements for the year ended 31 December 2017. These explanatory notes attached to the interim financial statements provide an explanation of events and transactions that are significant to an understanding of the changes in the financial position and performance of the Group since the year ended 31 December 2017.

The financial statements of the Group have been prepared in accordance with Financial Reporting Standards ("FRS"), generally accepted accounting principles and the Companies Act, 2016 in Malaysia.

#### A2. Significant accounting policies

The accounting policies adopted are consistent with those of the previous financial year except as otherwise stated below.

At the date of authorisation of the financial statements, the following new FRSs, Amendments to FRSs and Issues Committee ("IC") Interpretation were issued but not yet effective and have not been applied by the Group and by the Company:

| # Annual Improvements to MFRS Standards 2015-2017 Cycle             |   |

A brief discussion on the significant new MFRSs, amendments/improvements to MFRSs and new IC Interpretations are summarised below. Due to the complexity of these new MFRSs, amendments/improvements to MFRSs and new IC Interpretations, the financial effects of their adoption are currently still being assessed by the Group and Company.

# **MFRS 9 Financial Instruments**

MFRS 9 introduces an approach for classification of financial assets which is driven by cash flow characteristics and the business model in which an asset is held. The new model also results in a single impairment model being applied to all financial instruments.

In essence, if a financial asset is a simple debt instrument and the objective of the entity's business model within which it is held is to collect its contractual cash flows, the financial asset is measured at amortised cost. In contrast, if that asset is held in a business model the objective of which is achieved by both collecting contractual cash flows and selling financial assets, then the financial asset is measured at fair value in the statements of financial position, and amortised cost information is provided through profit or loss. If the business model is neither of these, then fair value information is increasingly important, so it is provided both in the profit or loss and in the statement of financial position.

(Company No. 820-V) (Incorporated in Malaysia)

# Part A : Explanatory Notes Pursuant to FRS 134 (Cont'd)

# A2. Significant accounting policies (cont'd)

# MFRS 9 Financial Instruments (cont'd)

MFRS 9 introduces a new, expected-loss impairment model that will require more timely recognition of expected credit losses. Specifically, this Standard requires entities to account for expected credit losses from when financial instruments are first recognised and to recognise full lifetime expected losses on a more-timely basis. The model requires an entity to recognise expected credit losses at all times and to update the amount of expected credit losses recognised at each reporting date to reflect changes in the credit risk of financial instruments. This model eliminates the threshold for the recognition of expected credit losses, so that it is no longer necessary for a trigger event to have occurred before credit losses are recognised.

MFRS 9 introduces a substantially-reformed model for hedge accounting, with enhanced disclosures about risk management activity. The new model represents a significant overhaul of hedge accounting that aligns the accounting treatment with risk management activities, enabling entities to better reflect these activities in their financial statements. In addition, as a result of these changes, users of the financial statements will be provided with better information about risk management and the effect of hedge accounting on the financial statements.

# MFRS 15 Revenue from Contracts with Customers

The core principle of MFRS 15 is that an entity recognises revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. An entity recognises revenue in accordance with the core principle by applying the following steps:

- i. identify the contracts with a customer;
- ii. identify the performance obligation in the contract;
- iii. determine the transaction price;
- iv. allocate the transaction price to the performance obligations in the contract;
- v. recognise revenue when (or as) the entity satisfies a performance obligation.

MFRS 15 also includes new disclosures that would result in an entity providing users of financial statements about the nature, amount, timing and uncertainty of revenue and cash flows from contracts with customers.

The following MFRSs and IC Interpretations will be withdrawn on the application of MFRS 15:

MFRS 111 Construction Contracts MFRS 118 Revenue IC Interpretation 13 Customer Loyalty Programmes IC Interpretation 15 Agreements for the Construction of Real Estate IC Interpretation 18 Transfer of Assets from Customers IC Interpretation 131 Revenue - Barter Transactions Involving Advertising Services

(Company No. 820-V) (Incorporated in Malaysia)

# Part A : Explanatory Notes Pursuant to FRS 134 (Cont'd)

#### A2. Significant accounting policies (cont'd)

#### **MFRS 16 Leases**

Currently under MFRS 117 Leases, leases are classified either as finance leases or operating leases. A lessee recognises on its statement of financial position assets and liabilities arising from the finance leases.

MFRS 16 eliminates the distinction between finance and operating leases for lessees. All leases will be brought onto its statement of financial position except for short-term and low value asset leases.

#### Amendments to MFRS 112 Income Taxes

Amendments to MFRS 112 clarify that decreases in value of debt instrument measured at fair value for which the tax base remains at its original cost give rise to a deductible temporary difference. The estimate of probable future taxable profits may include recovery of some of an entity's assets for more than their carrying amounts if sufficient evidence exists that it is probable the entity will achieve this.

The amendments also clarify that deductible temporary differences should be compared with the entity's future taxable profits excluding tax deductions resulting from the reversal of those deductible temporary differences when an entity evaluates whether it has sufficient future taxable profits. In addition, when an entity assesses whether taxable profits will be available, it should consider tax law restrictions with regards to the utilisation of the deduction.

# IC Int 23 Uncertainty over Income Tax Treatments

IC Int 23 clarifies that where there is uncertainty over income tax treatments, an entity shall assume that a taxation authority will examine amounts it has a right to examine and have full knowledge of all related information when making those examinations. It shall also reflect the effect of uncertainty in determining the related tax position (using either the most likely amount or the expected value method) if it concludes it is not probable that the taxation authority will accept an uncertain tax treatment.

# A3. Comparatives

The have been no material changes to the comparative figures.

# A4. Seasonal or cyclical factors

Turnover is also dependent on price fluctuations of Crude Palm Oil ("CPO") which are not within the Company's control but are determined by the global supply and demand for edible oils.

Production of fresh fruits bunches of oil palms ("FFB") is affected by weather conditions, the age of the palms and seasonal biological stress.

#### Part A : Explanatory Notes Pursuant to FRS 134 (Cont'd)

#### A5. Items affecting assets, liabilities, equity, net income or cash flows

There were no items affecting assets, liabilities, equity, net income or cash flows that are unusual because of their nature, size or incidence.

#### A6. Change in estimates

There were no changes in estimates that have a material effect in the current quarter.

#### A7. Debt and equity securities

There were no issuance, cancellations, repurchase, resale and repayments of debt and equity securities in the current quarter.

# A8. Dividend paid

On 4<sup>th</sup> May 2018, the Company announced a single tier interim dividend of RM0.04 per ordinary share amounting to RM2,594,018. This dividend was paid on 8<sup>th</sup> June 2018.

| Yield pe      | er hectare                       | 10.63                       | 13.42      | (2.79)           | (21) |

The Group registered revenue of RM13.94 million in the current period, a decrease of 37% as compared to the preceding year corresponding period.

The decrease in revenue is due to a decrease in the average selling price of fresh fruit bunches of palm oil ("FFB"), and in the production of FFB of 21% and 21% respectively compared to the preceding year corresponding period.

The Group also recorded a pre-tax profit in the current period of RM5.27 million against pre-tax profit of RM13.05 million compared to the preceding year corresponding period, a decrease of 60%.

The higher FFB cost per MT in the current period as compared to the preceding year corresponding period is due to the timing of our inorganic manuring programme and the lower production of FFB.

The lower pre-tax profit is due to primarily the lower revenue.

The Australian subsidiary is an investment holding real estate company that develops and rents out its properties. The properties owned by this company are substantially tenanted as at 30 June 2018. The lower revenue and profit before tax is primarily due to a weaker Australian Dollar against the Ringgit Malaysia in the current period as compared to the preceding year corresponding period.

# Plantations

The current quarter's recorded pre-tax profit of RM2.35 million on revenue of RM6.62 million as compared to pre-tax profit of RM2.92 million on revenue of RM7.32 million posted in the immediate preceding quarter.

The decrease in revenue is primarily due to the decrease in the average price and production of FFB. The lower pre-tax profit is due to primarily the lower revenue.

# **Real Estate Investment**

The Australian subsidiary is an investment holding real estate company that develops and rents out its properties. The properties owned by this company are substantially tenanted as at 30 June 2018.

# Part B : Explanatory notes pursuant to Appendix 9B of the Main Market Listing Requirements of Bursa Malaysia Securities Berhad (Cont'd)

### B3. Prospects

The directors expect reasonable performance from the Group for the coming year as indicated in the prospects of the business divisions below:

#### Plantation

The prospects are very much dependent on weather conditions, the global edible oil and its related markets, global economic conditions and how they impact production of FFB and CPO prices. Based on the current market trend and demand for CPO which augurs a favourable outlook for oil palm plantations.

#### Real Estate Investment

Barring any unforeseen circumstances, the Directors expect this division to be profitable and its performance for the coming year to be satisfactory.

#### B4. Profit forecast

Not applicable as no profit forecast was published.

### B5. Tax expense

|                                | 6 months           | 6 months ended     |  |  |
